# Personal Reflection
Template

Overview & Reflection

We would like you to complete a brief reflection on your learning.

Using the section below, we would like you to briefly describe:

- What's are the key things that you have learnt?
- What's are the key things that you will want to improve, or do differently?

Please type your response here.

In week 1, the AGILE principles and user story creation was all new to me, and was very interesting and intuitive to approach.

The acceptance criteria in particular was difficult for me because in some cases it was very difficult to translate the objectives into this criteria, but I was assured by Richard my entries looked good.

SQL was less of a challenge for me as I have previously coded it before; all the knowledge was new and fresh for me in terms of syntax, but the general concepts behind databases, lists, arrays etc are topics I have a general understanding of.

I would like to do some practice sessions repeatedly on a weekly/fortnightly basis, taking an idea from the user story stage right through to coding in SQL and other necessary file types to ensure I have the syntax to mind and can learn it fluently.

Submission instructions

To submit your reflection, please follow these steps:

1. Write your reflection above and save this PDF file
2. Return to Bud
3. On your activity window in Bud, click on the 'Submissions and Messages' button
4. Click on the 'Submit Work/Message'
5. Upload this PDF file
6. Click on the 'Submit' button

Once you have completed the steps above, you'll have submitted your work. We'll be in touch shortly and mark your activity as 'complete'. In the meantime, feel free to contact us if you need any help – we're here to support you.
